

Mission DINGO Defence

A partnership with Eclips Logistics and SAP in 2020 saw DINGO support a Defence Innovation Hub project. New products and services capabilities were delivered to Army's Sense and Response Logistics Concept.

DINGO's engineering and customer services teams were put to the test, to work hand in hand with our Army and Defence Industry partners, to solve some of the maintenance and management challenges they were facing.

As a result, DINGO Defence was raised in 2021. This new entity is allowing DINGO to expand into the Defence Industry and help create quality maintenance and monitoring software solutions.

DINGO sees the Defence Industry as an integral partner in our future, fuelling our support of initiatives such as the Integra Service Dogs Australia's Coast to Coast Ride held in May 2021.
